

# SCOTTIE

## 3D COLLABORATION PLATFORM

# HOW CAN MY REMOTE TEAM SHARE THE SAME SPACE AT A MOMENT'S NOTICE?

## ADD A NEW DIMENSION TO REMOTE MEETINGS

SCOTTIE is a shared virtual engineering space:

- Geographically dispersed teams get together whenever they need without the burden of traveling.
- Walk through the layout of an industrial plant or discuss 3D prototypes with your colleagues with or without Virtual Reality headsets.
- Collaborate naturally and with the same efficiency as an in-person meeting from anywhere.

### Download and Go

No special infrastructure needed

### Headset or Keyboard

Support remote teammates with VR headsets or compatible computer

### Data Governance

Keep your assets on premises to comply with your data governance policies

### Open Source

Available through MIT License for customizability
